Administration & Absorption of Parenteral Medications
1991 28 min Videotape E1217
After reviewing the significant advantages and disadvantages of administering a drug by injection, the program delineates underlying physiological principles related to the absorption of drugs when administered into superficial tissues, and into intramuscular tissue. Presents details for determining injection site and needle choice. Demonstrates injection procedures and safety precautions. Cites typical examples of drugs administered via each injection route. Delineates precautions to observe for avoiding trauma, as well as special techniques that alter absorption rate of an injected drug. Also includes use of the Z-track method.

Drugs—Administration; Nursing; Parenteral Therapy

Administration & Absorption of Topical Medications
1991 24 min Videotape E1218
Explains the significant anatomical and biochemical factors that affect drug absorption in the skin, oral mucosa, respiratory tract, rectal mucosa, nasal mucosa and the eye. Distinguishes between the localized effect and the systematic effect of drugs administered at these sites. Cites examples of typical drugs and specifies significant key points of administration techniques, along with precautions for each route.

AIDS and Hepatitis B Prevention for Healthcare Workers
1990 33:21 min Videotape E2036
This video details how healthcare workers can prevent AIDS and Hepatitis B in the workplace.

Nursing

AIDS and Safe Nursing Practices
1992 25 min Videotape E2844
Hosts Cecelia Gatson Grindel and Diane Henley Peters look at ways to avoid exposure to HIV and AIDS while still providing quality nursing service to all patients. Stresses that the ability to provide compassionate treatment of AIDS patients, and safe treatment of all patients depends on care givers' knowledge of the disease, adherence to universal precautions, and utilization of engineering controls.

Avoiding Charges of Negligence
2002 25 min Videotape E6896

"Defines professional negligence, and reviews the elements that must be proven to sustain such a charge. Lists common pitfalls associated with negligence, and suggests strategies to avoid them. Describes how to decrease negligence risk by providing care that is both competent and caring...After viewing the program the learner will be able to: define professional negligence; state the four elements that must be proven to sustain a charge of negligence; cite the phases of a negligence lawsuit; cite guidelines to reduce liability risk; recognize situations with the potential for patient injuries; recognize how to reduce negligence potential through competent and caring nursing practice."
Nursing – Law and Legislation; Video recordings for the hearing impaired

Avoiding Medication Errors
1989 30 min Videotape E2006 CON0317

Medication errors are one of the most common legal problems for the nursing profession. The most likely cause of these errors? A failure to follow routine medication administration procedures. How safe are you? Do you know the four most common medication errors and how to avoid them? Do you know what steps in the medication process increase your potential for error? And what precautions you can take to reduce your risk?

Nursing

Basic Nursing Skills: Application of Heat and Cold
1992 21 min videotape e2794a2

Outlines several basic nursing skills and discusses and demonstrates methods for the optimal effectiveness of each treatment.
Bandages and Bandaging; Nursing; Surgical Dressings

Basic Nursing Skills: Range of Motion
1992 21 min Videotape E27940a2

Removed by request of Martha Conrad in the College of nursing due to outdated material Outlines several basic nursing skills and discusses and demonstrates methods for the optimal effectiveness of each treatment.
Bandages and Bandaging; Nursing; Surgical Dressings

Basic Principles
2002 21:48 min e6749

Review's the basic principles of nursing. Illustrates the roles and responsibilities of nursing team members, the nursing process, and patient and resident rights.
Nursing

Bathing
2002 23:57 min videotape E675501

Demonstrates how to give a complete bed bath, including perineal care
Bathing; Care of the Sick; Nursing

Battling for Babies
2000 52 min Videotape E6370

The neonatal unit at Johns Hopkins in Baltimore is the focus of this episode of the series, Nurses, as the viewer gets a first-hand look at the daily routine in a busy critical care unit. Working with premature babies, the program following the case of the triplet girls, two born with respiratory problems, and a baby boy born over three months too early. The nurses also work with well-woman/prenatal/postnatal programs and with parent and siblings to deal with the realities of premature birth. The nurses discuss the satisfaction with their jobs, as well as how they deal with the death of a patient.
Childbirth; Nursing

Bedmaking
2002 15:18 min e675601

Demonstrates how to make an occupied hospital bed.
Bedmaking; Nursing

Biomechanical Considerations for Human Tolerances
1982 35 min Videotape E2183

Describes and analyzes the forces at work in the human body when an athlete participates in sports activities. Discusses how biomechanics can modify an individual's performance and prevent injuries. Also talks about the importance of the effective interaction of coaches, athletes, and sports medicine professionals in encouraging a safer sport environment.

Ground reaction force (Biomechanics); Biomechanics; Human Mechanics; Kinesiology; Sports injuries–Prevention

Blood Disorders
See The Comprehensive Nclex-Rn Video Review Series

Body Mechanics and Exercise
2002 17 min Videotape E6727

DEMONSTRATES THE PROPER METHODS OF POSITIONING AND TRANSFERRING PATIENTS FROM BED TO WHEELCHAIR OR TO AN UPRIGHT POSITION. SHOWS HOW TO HELP A PATIENT WALK, AND EXERCISES TO ENSURE RANGE OF JOINT MOTION.

Biomechanics; Exercise therapy; Human Mechanics; Nursing

Breasts and Axillae
1995 11 min Videotape E3958 copy 2

Presents inspection and palpation of the female and male breasts, and inspection and palpation of the axillae. Examiner will assess a healthy patient.
Breast–Examination; Periodic Health Examinations; Physical Diagnosis

Budget Basics, Part 1: Understanding Resources
1998 75 min Videotape E6402a1

Looking beyond the care and treatment of patients, this set of videotapes examines facility budgets, revenue, income, budget variances, and basic financial planning skills.
Budget; Hospital Care; Nursing

Budget Basics, Part 2: Analyzing Performance
1998 75 min Videotape E6402b1

Looking beyond the care and treatment of patients, this set of videotapes examines facility budgets, revenue, income, budget variances, and basic financial planning skills.
Budget; Hospital Care; Nursing

Calgary Family Assessment Model: How to Apply in Clinical...
2001 26 min Videotape E672001

The Calgary Family Assessment Model (CFAM) is a comprehensive, three-pronged, structural, developmental, and functional family assessment framework. Nurses will see in action examples of specific questions the nurse can ask the family, how to talk about the genogram and ecomap with families, and how to construct circular pattern diagrams in a clinical setting.
Interviewing; Nursing assessment

Community Health Nursing Video Series
This series contains eight individual video tapes in two sets provides a comprehensive visual introduction to the principles and practice of community health nursing. In these videos the concept of community health nursing are brought to life in realistic case scenarios that show community health nurses in action. The host of the series explains the nursing process involved in each video and how that process is illustrated in the scenarios. An accompanying Instructor's Resource Booklet provides an overview of the video content, a detailed outline, and pre- and post-viewing questions to stimulate class discussion.
Communicable Diseases–Prevention; Epidemiology; Food Poisoning; Nursing–Social aspects; Nursing assessment; Sexually transmitted diseases – Prevention; Transcultural nursing

This Is Community Health Nursing
1995 25 min Videotape E3879
Nurses describe what they like about community health nursing, and are shown involved in a wide variety of community activities and functions, including health teaching, home visits, community assessment, family assessment, culture in the community, and epidemiology. Also covers the history and definition of community health nursing and looks at standards for community health care.
Nursing assessment

The Comprehensive Nclex-Rn Video Review
This is a series of 31 video tapes in the NCLEX-RN Video Review.

Anxiety
1992 45 min VIDEOTAPE 1593
Lecture by Dr. Verna Carson which reviews the topic for student nurses preparing for the NCLEX-RN exam. Identifies levels of anxieties and covers the dysfunctional responses: panic disorders, obsessive compulsive, phobic, conversation disorders, hypochondriacs, and anti-anxiety drugs, as outlined in MEDS, Inc. Comprehensive NCLEX-RN exam review manual by Patricia Hoefler. Anxiety; Nursing–Examinations, Questions, Etc; Psychiatric nursing

Blood Disorders
1992 25 min Videotape 1585
Lecture by Dr. Eleanor Walker which reviews the topic for student nurses preparing for the NCLEX-RN exam. Covers key information about iron deficiency, aplastic anemia, pnicious anemia, and blood transfusions, as outlined in MEDS, Inc. Comprehensive NCLEX-RN exam review manual by Patricia Hoefler. Blood-Vessels–Diseases; Nurses; Nursing–Examinations, Questions, Etc; Surgical Nursing

Cardiovascular Disorders
1992 60 min Videotape E1587
Lecture by Dr. Ann O’Mara which reviews the topic for student nurses preparing for the NCLEX-RN exam. Covers the dynamics of the CV system in failure, CVP, ECG, cardiac catheterization, myocardial infarction, CHF, heart block, pacemakers, ASO, hypertension, venous disorders, shock, and CPR, as outlined in MEDS, Inc. Comprehensive NCLEX-RN exam review manual by Patricia Hoefler. Cardiovascular system – Diseases – Nursing; Nursing–Examinations, Questions, Etc; Surgical Nursing

Chemical Dependency
1992 35 min Videotape E1596
Lecture by Dr. Verna Carson which reviews the topic for student nurses preparing for the NCLEX-RN exam. Reviews chemical dependency and substance abuse disorders, including alcohol dependency, withdrawal, delirium tremors, treatment, and rehabilitation, as outlined in MEDS, Inc. Comprehensive NCLEX-RN exam review manual by Patricia Hoefler. Alcoholism–Nursing; Drug Abuse; Nursing; Nursing–Examinations, Questions, Etc; Substance Abuse

The Child Accident Victim
1992 45 min Videotape E1608
Lecture by Dr. Michel Michael which reviews the topic for student nurses preparing for the NCLEX-RN exam. Includes general emergency care, burns, fractures, and ingestions, as outlined in MEDS, Inc. Comprehensive NCLEX-RN exam review manual by Patricia Hoefler. Emergency nursing; Nursing–Examinations, Questions, Etc; Pediatric nursing

The Child with an Oncological Disorder
1992 50 min Videotape E1610
Lecture by Dr. Michele Michael which reviews the topic for student nurses preparing for the NCLEX-RN exam. Reviews leukemia, nephroblastoma (wilms tumor) Neuroblastoma, and Hodgkin's lymphoma, as outlined in MEDS, Inc. Comprehensive NCLEX-RN exam review manual by Patricia Hoefler. Cancer–Nursing; Communicable Diseases; Pediatric nursing

The Child with Chronic Problems
1992 55 min Videotape E1609
Lecture by Dr. Michele Michael which reviews the topic for student nurses preparing for the NCLEX-RN exam. Includes allergies, asthma, rheumatic fever, JRA, diabetes, sickle cell, cerebral palsy, nephritis and cystic fibrosis, as outlined in MEDS, Inc. Comprehensive NCLEX-RN exam review manual by Patricia Hoefler. Nursing–Examinations, Questions, Etc
Nursing

Congenital Anomalies
1992  55 min  Videotape E1605
Lecture by Dr. Michele Michael which reviews the topic for student nurses preparing for the NCLEX-RN exam. Includes congenital heart defects, hydrocephalus, myelomeningocele, CDH, congenital clubfoot, cleft lip, and cleft palate, as outlined in MEDS, Inc. Comprehensive NCLEX-RN exam review manual by Patricia Hoefler.

Cerebral Palseied Children; Nursing–Examinations, Questions, Etc; Pediatric nursing; Physically Handicapped Children–Care and Treatment

Defense Mechanisms
1992  40 min  Videotape E1592
Lecture by Dr. Verna Carson which reviews the topic for student nurses preparing for the NCLEX-RN exam. Reviews nurse-client relationships, defense mechanisms, and communications skills, as outlined in MEDS, Inc. Comprehensive NCLEX-RN exam review manual by Patricia Hoefler.

Communication in nursing; Defense Mechanisms (Psychology; Nurse and Patient; Nursing–Examinations, Questions, Etc; Psychiatric nursing

Endocrine Disorders
1992  80 min  Videotape E1586
Lecture by Dr. Anna O’Mara which reviews the topic for student nurses preparing for the NCLEX-RN exam. Reviews the function of each hormone and includes acromegaly, Addison’s disease, Cushing syndrome, Grave’s disease, thyroidectomy, hyperparathyroidism, diabetes mellitus and insulin therapy, as outlined in MEDS, Inc. Comprehensive NCLEX-RN exam review manual by Patricia Hoefler.

Endocrine Glands; Nursing–Examinations, Questions, Etc; Surgical Nursing

Fluid and Electrolytes
1992  50 min  Videotape E1580
Lecture by Dr. Eleanor Walker which reviews the topic for student nurses preparing for the NCLEX-RN exam. Covers the basics of respiratory and metabolic acidosis and alkalosis, and blood gasses, as outlined in MEDS, Inc. Comprehensive NCLEX-RN exam review manual by Patricia Hoefler.

Body Fluids; Nursing–Examinations, Questions, Etc; Surgical Nursing

Gastrointestinal, Hepatic and Pancreatic Disorders
1992  100 min  Videotape E1583
Lecture by Dr. Eleanor Walker which reviews the topic for student nurses preparing for the NCLEX-RN exam. Pt. 1 covers digestive procedures and disorders such as upper and lower GI, sigmoidoscopy, liver biopsy, paracenteses, TPN, peptic ulcers, gastric resection, ulcerative colitis, colorectal, and ileostomy and pt. 2 covers hepatitis A, hepatitis B, cirrhosis, esophageal varices, cholecystectomy, and pancreatitis, as outlined in MEDS, Inc. Comprehensive NCLEX-RN exam review manual by Patricia Hoefler.

Gastrointestinal System; Liver; Nursing–Examinations, Questions, Etc; Pancreas; Surgical Nursing

Genitourinary Disorders
1992  70 min  Videotape E1588
Lecture by Dr. Ann O’Mara which reviews the topic for student nurses preparing for the NCLEX-RN exam. Teaches about diagnostic exams such as renal function tests, KUB, IVP, cystoscopy, kidney biopsy. Includes glomerulonephritis, nephrotic syndrome, urolithiasis, chronic renal failure, peritoneal and hemodialysis, prostatectomy, and kidney transplants, as outlined in MEDS, Inc. Comprehensive NCLEX-RN exam review manual by Patricia Hoefler.

Genitourinary organs; Nursing–Examinations, Questions, Etc; Surgical Nursing

Growth and Development
1992  90 min  Videotape e160401
Lecture by Dr. Michele Michael which reviews the topics for student nurses preparing for the NCLEX-RN exam. Teaches about the stress of hospitalization and characteristics of development for infancy through adolescent, as outlined in MEDS, Inc. Comprehensive NCLEX-RN exam review manual by Patricia Hoefler.

Child Development; Infants; Nursing

Mood Disorders
1992  40 min  Videotape E1595
Lecture by Dr. Vera Carson which reviews the topic for student nurses preparing for the NCLEX-RN exam. Addresses depression and elation. Reviews mood disorder continuum, range and severity of moods, suicide, anti-depressant agents, antimania agents, and ECT therapy, as outlined in MEDS, Inc. Comprehensive NCLEX-RN exam review manual by Patricia Hoefler.

Depression, Mental–Treatment; Nursing–Examinations, Questions, Etc; Psychology, Pathological; Psychotherapy

Musculoskeletal Disorders
1992  50 min  Videotape E1584
Lecture by Dr. Eleanor Walker which reviews the topic for student nurses preparing for the NCLEX-RN exam. Covers the basics about rheumatoid and osteoarthritis, skeletal and skin traction, fractures, crutch walking, amputation, and Lupis, as outlined in MEDS, Inc. Comprehensive NCLEX-RN exam review manual by Patricia Hoefler.

Musculoskeletal System–Anatomy; Nursing–Examinations, Questions, Etc; Surgical Nursing

Neurological Disorders
1992  110 min  Videotape E1589
Lecture by Dr. Ann O’Mara which reviews the topic for student nurses preparing for the NCLEX-RN exam. Pt. 1 discusses diagnostic procedures (lumbar puncture, CAT, ECT, myelogram), and conditions such as ICP, seizures, CVATIA, and pt. 2 covers spinal cord and head injuries, MS, Parkinson’s disease, myasthenia gravis, cataracts and glaucoma, as outlined in MEDS, Inc. Comprehensive NCLEX-RN exam review manual by Patricia Hoefler.

Nervous System–Diseases; Nursing–Examinations, Questions, Etc; Surgical Nursing

Oms, Eating, Violence, Legal
1992  50 min  Videotape E1597
Lecture by Dr. Verna Carson which reviews the topics for student nurses preparing for the NCLEX-RN exam. Includes anorexia / bulimia, retardation personality disorders, signs of abuse, rape, and the legal aspects of psychiatric nursing, as outlined in MEDS, Inc. Comprehensive NCLEX-RN exam review manual by Patricia Hoefler.

Nursing–Examinations, Questions, Etc; Personality disorders; Psychiatric nursing; Psychology, Pathological
Nursing

Oncology Nursing: Burns
1992  60 min  Videotape E1590
Lecture by Dr. Ann O'Mara which reviews the topic for student nurses preparing for the NCLEX-RN exam. Covers neoplastic diseases, including the manifestations, types of cancer therapy, chemotherapy and radiation assessment and treatment of burns, as outlined in MEDS, Inc. Comprehensive NCLEX-RN exam review manual by Patricia Hoefler.
Burns and Scalds; Cancer–Nursing; Nursing–Examinations, Questions, Etc; Surgical Nursing

Pre and Post Operative Care
1992  35 min  Videotape E1582
Lecture by Dr. Eleanor Walker which reviews the topic for student nurses preparing for the NCLEX-RN exam. Covers informed consent, pre and post op drugs, assessment, and post op complications, as outlined in MEDS, Inc. Comprehensive NCLEX-RN exam review manual by Patricia Hoefler.
Nursing–Examinations, Questions, Etc; Preoperative Care; Surgical Nursing

Psychiatric Nursing
1992  60 min  Videotape E1591
Lecture by Dr. Verna Carson which reviews the topic for student nurses preparing for the NCLEX-RN exam. Reviews the role of the nurse in models of treatment and discusses Erikson, Maslow, behavior modification, crisis intervention and self help groups, as outlined in MEDS, Inc. Comprehensive NCLEX-RN exam review manual by Patricia Hoefler.
Nurse and Patient; Nursing–Examinations, Questions, Etc; Psychiatric nursing

Respiratory Disorders
1992  100 min  Videotape E1581
Lecture by Dr. Eleanor Walker which reviews the topic for student nurses preparing for the NCLEX-RN exam. Reviews the most frequently tested disorders such as COPD, pneumothorax, asthma, and chest tubes and pt. 2 covers TB, pneumonia, chronic bronchietasis, chest PT and AIDS, as outlined in MEDS, Inc. Comprehensive NCLEX-RN exam review manual by Patricia Hoefler.
Respiratory Organs–Diseases; Surgical Nursing

Review of Female Reproductive Nursing
1992  45 min  Videotape E1598
Lecture by Dr. Cathy Romeo which reviews the topic for student nurses preparing for the NCLEX-RN exam. Covers anatomy and physiology, fetal development, teratogenic effects, signs of pregnancy and emotional adaptation, as outlined in MEDS, Inc. Comprehensive NCLEX-RN exam review manual by Patricia Hoefler.
Generative Organs, Female; Human Reproduction; Nursing–Examinations, Questions, Etc; Obstetrics

Review of Gynecology
1992  30 min  Videotape E1603
Lecture by Dr. Cathy Romeo which reviews the topic for student nurses preparing for the NCLEX-RN exam. Includes Vaginal Infections, cancer, uterine disorders, tubal disorders, and medications, as outlined in MEDS, Inc. Comprehensive NCLEX-RN exam review manual by Patricia Hoefler.
Generative Organs, Female–Diseases–Nursing; Gynecologic Nursing; Nursing–Examinations, Questions, Etc

Review of Labor and Delivery
1992  50 min  E1599
Lecture by Dr. Cathy Romeo which reviews the topic for student nurses preparing for the NCLEX-RN exam. Covers components of labor, signs of impending labor, stages of labor, anesthesia for labor and delivery, and operative obstetrics, as outlined in MEDS, Inc.

Review of Reproductive Risk
1992  75 min  Videotape E1601
Lecture by Dr. Cathy Romeo which reviews the topic for student nurses preparing for the NCLEX-RN exam. Includes high risk pregnancy, cardiac, diabetics, polydraminos, abortion, ectopic pregnancy, incompetent cervix, pregnancy induced hypertension, placenta previa, fetal distress, premature labor, emergency childbirth, postpartum and fetal assessment, as outlined in MEDS, Inc. Comprehensive NCLEX-RN exam review manual by Patricia Hoefler.
Nursing–Examinations, Questions, Etc; Pregnancy, Complications Of

Schizophrenia: Paranoid
1992  50 min  Videotape E1594
Lecture by Dr. Vera Carson which reviews the topic for student nurses preparing for the NCLEX-RN exam. Defines the major characteristics, treatment, and nursing interventions associated with schizophrenia, and suspicious patterns of behavior, including autism and paranoia, and the use of anti-psychotic drugs, as outlined in MEDS, Inc. Comprehensive NCLEX-RN exam review manual by Patricia Hoefler.
Psychiatric Nursing; Nursing–Examinations, Questions, Etc; Paranoid; Psychiatric nursing; Schizophrenia

The Surgical Child
1992  25 min  Videotape E1607
Lecture by Dr. Michele Michael which reviews the topic for student nurses preparing for the NCLEX-RN exam. Reviews pre-operative and post-operative care and common surgical problems, as outlined in MEDS, Inc. Comprehensive NCLEX-RN exam review manual by Patricia Hoefler.
Nursing; Pediatrics

Computerized Adaptive Testing
1993  51 min  Videotape E3949
Rose Lee Weinert presents and explains the new computerized testing methodology to be implemented for the National Council Licensure Examination (NCLEX) by 4/1/94, describing the advantages of using this method, the reasons for its adoption, and how it will be used.
Nursing–Examinations, Questions, Etc

Conflict of Resolution Equals Staff and Retention
1991  28 min  Videotape E3318
Examines the necessary role of conflict within an organization. Teaches the five ways of handling conflict, and shows when and how to use each one. Offers perspective on how role conflict relates to the retention or non-retention of staff.
Conflict Management; Motivation (Psychology); Nursing

Congenital Anomalies
See The Comprehensive Nclex-Rn Video Review Series

Consent to Treatment
1984  19 min  Videotape D391
Discusses the legal rights of clients to consent to treatment and the nurse's responsibilities for assisting in obtaining consent.
Medical Care; Medical Ethics; Nursing; Nursing Ethics

A Conspiracy of Silence
1992  21 min  Videotape E2990
Presents interviews with hospital nurses and nurse administrators to examine the problem of drug diversion and substance dependence among nursing staff. Additional information provided by narrator.
Drug abuse; Drug Abuse; Nursing; Nurses

Council Licensure Examination (NCLEX) by 4/1/94, described the advantages of using this method, the reasons for its adoption, and how it will be used.
Nursing–Examinations, Questions, Etc

Conflict of Resolution Equals Staff and Retention
1991  28 min  Videotape E3318
Examines the necessary role of conflict within an organization. Teaches the five ways of handling conflict, and shows when and how to use each one. Offers perspective on how role conflict relates to the retention or non-retention of staff.
Conflict Management; Motivation (Psychology); Nursing

Congenital Anomalies
See The Comprehensive Nclex-Rn Video Review Series

Consent to Treatment
1984  19 min  Videotape D391
Discusses the legal rights of clients to consent to treatment and the nurse's responsibilities for assisting in obtaining consent.
Medical Care; Medical Ethics; Nursing; Nursing Ethics

A Conspiracy of Silence
1992  21 min  Videotape E2990
Presents interviews with hospital nurses and nurse administrators to examine the problem of drug diversion and substance dependence among nursing staff. Additional information provided by narrator.
Drug abuse; Drug Abuse; Nursing; Nurses
Copp: Care in the Geriatric Patient  
1996 33 min Videotape E401502  
Prepresents the characteristics, physiological and psychological indicators of COPD, Chronic obstructive pulmonary disease, in geriatric patients. Discusses common problems encountered by patients and describes nursing interventions and care planning for patients with COPD. Covers nursing implementa-
tions of drug therapies frequently used in managing the disease, and describes the process of pulmonary rehabilita-
tion of the geriatric patient with COPD. Encourages treatment of this disease and demonstrates how nursing and medical care can improve case outcomes, resulting in an increase in the patients' quality of life, sense of psychological well being, functional status, and a decrease in illness and acute hospital stays.  
Respiratory diseases in old age; Lungs - Diseases - Patients- Rehabilitation; Geriatric Nursing; Lungs--Diseases, Obstructive

Creative Problem Solving: How to Get Better Ideas  
1979 27 min Videotape E191  
Shows how individuals function with unconscious mental restrictions, and tells how to become free of such restrictions and discover one's own creative ability; thus increasing the ability to solve problems.  
Creative Ability; Creative Thinking; Problem Solving

Critical Care  
2000 52 min Videotape E6369  
The emergency room at Johns Hopkins Hospital is the focus of this episode of the series, Nurses, as the viewer gets a first hand look at the daily routine in a busy critical care unit. In this chaotic atmosphere, the nurses are followed as they preform triage to prioritize patient care. They work with various patients in various conditions, providing both medical care and emotional support, while also anticipating doctor and resident needs. The nurses comment on the satisfaction they find in their work, as well as the stresses and dangers they encounter.  
Emergency nursing; Nursing

Cultural Diversity in Healthcare: A Different Point of View  
1994 23 min Videotape E3502  
Joyce Newman Giger, Ruth Davighizer and others explain what cultural diversity is and why it is important to health care professionals in their interaction with patients, their families, and co workers. Identifies the six cultural phenomena that reflect psychosocial and cultural needs and expectations. Diversity in the workplace; Ethnic Groups; Intercultural Communication; Medical Personnel and Patient; Minorities—edical Care—ited States; Nursing; Transcultural nursing; Transcultural medical care

Dealing with Death and Dying  
1991 49 min Videotape E1786  
Provides guidance for nurses who must care for dying pa-
tients Covers the nurse's responsibilities to the dying patient, the patient's family, and to herself/himself. Topics include help- ing the patient maintain his sense of dignity, how to give the patient a sense of control, responding to the pa-
tients special needs, how to help the patient work through his fears, and how to help the patient's family.  
Death; Nurse and Patient; Nursing; Terminal Care; Terminally Ill Children—Family Relationships

Nursing

Digitizing  
1985 15 min Videotape E2269  
Demonstrates the use of the digitizer, a specialized tool to measure mechanics of the human body from motion picture frames.  
Biomechanics; Digital electronics; Human Mechanics; Radiography; Sports Medicine

Documentation - the Best Defense  
2002 25 min Videotape E6897  
Focuses on the legal relevance of the medical record. Outlines basic documentation principles, and describes legally perilous charting practices. Discusses how to reduce liability when documenting difficult situations, and provides information on legal issues and computerized documentation...After viewing the program, the learner will be able to: cite the legal relevance of the medical record; list basic documenta-
tion principles; Recognize legally perilous charting practices; identify how to reduce legal liability when documenting diffi-
cult situations; state legal issues associated with computer-
ized documentation.  
Nursing – Law and Legislation; Video recordings for the hearing impaired

Dysphagia  
1975 22 min Videotape D166  
Exploresthe dysphagia syndrome: identifies abnormal vari-
atations in the chew-swallow process; discusses rehabilita-
tion techniques and identifies various medical roles in the reha-
ilitation process.  
Nursing

Effective Delegation  
1991 29 min Videotape E3319  
Shows why delegation is crucial to effective management, with examples of why some managers dont delegate well. Lists the benefits of delegation to the manager, the staff and the organization, explaining how to delegate, and what to consider from a legal standpoint. Lets the viewer critique two examples, identifying both good and poor elements. Lists the common pitfalls and limitations of delegation. Allows viewers to assess their own abilities and style, and practices aspects of effective delegation.  
Delegation of Authority; Nursing

Endocrine Disorders  
See The Comprehensive Nclex-Rn Video Review Series

Enteral Nutrition  
2002 23:23 min Videotape E676601  
This video presents feeding tube insertion using the nasogas-
tric route, including confirmation of tube placement; enteral feedings; feeding tube irrigation; feeding tube removal. Enteral feeding; Nursing; Nutrition

Equipment and Oxygen Therapy  
1994 22 min Videotape E6645  
Describes the practices and procedures of oxygen adminis-
tration to combat hypoxia. Demonstrates use of nasal can-
nula, nasal catheter, oxygen masks, transtracheal oxygen and home delivery systems.  
Nursing; Nursing Home Patients; Oxygen Therapy

Equipment Preparation  
See Parenteral Medication Administration Series
Essential Components of Physical Assess: Conducting the Exam
1996 21 min Videotape E4767
This program presents a real time scenario that integrates both the communication and the technical skills necessary for conducting the basic physical assessment. The complete verbal interaction between the client and the nurse is portrayed, allowing the viewer to focus on the nurse's dialogue, non-verbal communication patterns, and steps of the basic assessment. This program includes the techniques and skills depicted in the Essential Elements of Physical Assessment: Demonstrating the Techniques videotape. This beginning level assessment can help the nurse determine whether more in depth assessment or referrals are needed.
Nurse and Patient; Nursing assessment; Physical Diagnosis

Establishing Competence with NCLEX Using CAT
1994 10 min Videotape E5014
Explains how CAT, Computer Adaptive Testing is used with NCLEX, The National Council Licensure Examinations for nursing, to determine passing or failing results through the administration of test questions which vary in quantity and difficulty based on the candidate's response to previous questions.
Nursing–Examinations, Questions, Etc

Ethical Dilemmas and Decision Making
1995 25 min Videotape E3877
Introduces basic concepts of bioethics and explains the principles of ethical decision making, using case studies in acute care, long term care, and community settings.
Bioethics; Medical Ethics; Nurse and Patient; Nursing Ethics

Ethics Values and Health Care: The Nature of Ethical Proble
Videotape E1683
 Defines the ethics and ethical dilemmas. Presents two major ethical theories: the teleological and deontological – which can be useful in helping one think through ethical issues. Presents a six-step model for analyzing ethical issues.
Ethics; Medical Ethics; Nursing Ethics

Ethics, Values and Health Care: Values Clarification
1987 16 min Videotape E1684
Presents the theory of values clarification along with seven steps in the values-clarifying process. Discusses several complex issues of an ethical nature around which caregivers need to clarify their values.
Ethics; Nursing Ethics; Values

The Family Tree of an Abg
1993 26 min Videotape E2635
Live footage from a critical care unit, enabling nurses and nursing students to easily understand acid-base balance, ABG interpretation and corresponding treatment modalities.
Nurses

Female Genitalia, Anus, and Rectum
1995 20 min Videotape E3961
Presents examination of the external genitalia, the internal genitalia, a bimanual examination of the vaginal wall, cervix and uterus, a rectovaginal examination of the uterus, and inspection and palpation of the anus and rectum.
Generative Organs, Female; Physical Diagnosis

Finishing Strong: Family Therapy with Aging Families
Videotape E2887
Presented by Terry Hargrave and William Anderson.
Engaging the concepts of contextual therapy, life validation, life review, and strategic intervention to help families work through issues of aging.
Aged – Care
Head-to-Toe Examination of the Adult
1999 26 min  Videotape E6165
Demonstrates the proper techniques for examining clients using footage of a mock exam, narration, computer graphics, and animation to clarify technique. Identifies relevant developmental and transcultural variations in patients.
Aged – Health and hygiene; Nursing assessment; Physical Diagnosis

Head-to-Toe Examination of the Geriatric Client
1999 28:37 min  Videotape E6164
Demonstrates the proper techniques for examining clients using footage of a mock exam, narration, computer graphics, and animation to clarify technique. Identifies relevant developmental and transcultural variations in patients.
Aged – Health and hygiene; Geriatric Nursing; Nursing assessment; Physical Diagnosis

The Helping Interview
2003 59 min  Videotape E6940a1
Part 1 discusses warmth, genuineness, openness and empathy as necessary interviewing qualities.
Part 2 focuses on opening the interview and the use questions and silence.
Part 3 illustrates general skills of selective responding and focusing and describes ways to close the interview.
Communication in nursing; Interpersonal Communication; Interviewing; Nurse and Patient; Video recordings for the hearing impaired

The Helping Interview
2003 59 min  Videotape E6940b1
Part 1 discusses warmth, genuineness, openness and empathy as necessary interviewing qualities.
Part 2 focuses on opening the interview and the use questions and silence.
Part 3 illustrates general skills of selective responding and focusing and describes ways to close the interview.
Communication in nursing; Interpersonal Communication; Interviewing; Nurse and Patient; Video recordings for the hearing impaired

The Helping Interview
2003 59 min  Videotape E6940c1
Part 1 discusses warmth, genuineness, openness and empathy as necessary interviewing qualities.
Part 2 focuses on opening the interview and the use questions and silence.
Part 3 illustrates general skills of selective responding and focusing and describes ways to close the interview.
Communication in nursing; Interpersonal Communication; Interviewing; Nurse and Patient; Video recordings for the hearing impaired

High Speed Cinematography
1985  Videotape E2276
Demonstrates the use of high speed cinematography in sports.
Biomechanics; Cinematography; Human Mechanics; Sports Medicine

How to Evaluate: From Design to Implementation
1991 45 min  Videotape E1082
Examination of criterial used to determine competency of clinical nursing programs and staff. Profiles hospitals and universities which have successfully implemented a clinical evaluation program such as the one at the School of Nursing at the State University of New York at Stony Brook.
Nursing

How to Evaluate: From Objective to Design
1990 22 min  Videotape E1081
Examination of nursing program evaluations and how to design evaluations for objectivity and accuracy.

Nursing

Pressure, Shear & Friction: Prevention & Intervention
1993 27 min  Videotape E1791/4
This program describes general nursing measures, such as frequent position changes, to reduce pressure for patients in both bed and wheelchair. It illustrates more advanced techniques, such as "bridging," for patients who require complete relief of pressure and discusses measures to reduce shear and friction. And it emphasizes the discharge planning and patient teaching which will be necessary to prevent or heal pressure ulcers at home.
Nursing

Improving Nurse-Client Effectiveness
See Transcultural Perspectives in Nursing Series

Interactions for Study
1990 13 min  Videotape E1111
Dramatizes nurse/patient interactions which illustrate the technique of and blocks to therapeutic communication. Instructs nurses to learn to identify both positive and negative events in the communication cycle.
Interpersonal Communication; Nursing; Nursing–Psychological Aspects; Sick–Psychology

Intervening and Documenting
1983  Videotape D513
Essentials of Electronic Fetal Monitoring
Infants (Newborn); Nursing

Intravenous Procedures
1992 33:30 min  Videotape E3744
Leading educators, ethicists, and clinicians suggest effective ways to address ethical and legal issues in the classroom and at the bedside. State nurse practice acts, patients' rights, informed consent, advanced directives, nurses as patient advocates, and the ethics of the American health care system are explored.
Nursing – Law and Legislation; Nursing–Law and Legislation–United States; Nursing Ethics

1987 26:01 min  Videotape E2035 CON0102
College of Nursing videos.
Nursing

Leadership Issues, Theoretical and Pragmatic
1977 31 min  Videotape D208
Describes different approaches to leadership, with vignettes that illustrate leadership behavior and skills. Defines leadership as a process rather than authority of power of position, and emphasizes the interpersonal nature of effective leadership.
Leadership; Nursing
Legal and Ethical Issues in Home Health Nursing 1996 19 min Videotape e4013
Deals with the legal and ethical issues facing those who offer and consider home health nursing options. Explores providing care for the client in his own environment, respect for the patients' preferences regarding treatment, dealing with patient privacy issues in working with family caregivers, handling situations where the visiting nurse and/or patient is in danger due to neglect or hostile actions of family members. Emphasizes the importance of support from colleagues and the nursing service staff. Nurse and Patient; Nursing Ethics; Public Health Nursing

Lippincott's Clinical Skills: Applying Protective Devices 1997 20 min Videotape E532401
Demonstrates a wide range of protective devices for patients restrained and discusses health care treatment to prevent infection. Emphasizes safety measures and good body mechanics. Biomechanics; Human Mechanics; Infection–Prevention; Nursing assessment

Lippincott's Clinical Skills Series
Contains 3 parts: Obtaining Vital Signs Gathering Assessment Data, Collecting Laboratory Specimens Hospital Care: Nurse and Patient; Nursing; Nursing assessment: Patient monitoring—Equipment and supplies; Physical Diagnosis

Obtaining Vital Signs 1997 28 min Videotape E4503a1
Presents general guidelines for obtaining vital signs, including correct procedures and interpretation of vital signs. Patient monitoring—Equipment and supplies; Physical Diagnosis

Collecting Laboratory Specimens 1997 17 min Videotape E4503c1
Presents an overview of procedures used to collect specimens, including demonstrations of techniques for obtaining a variety of specimen types. Includes safety tips, and information on legal issues and documentation requirements. Nursing; Physical Diagnosis

Listen: Helping Children Deal with Their Feelings 1989 30 min Videotape E2056 CON089212
1 videocassette sd., col. ; 1/2 in. Series How to talk so kids will listen Nursing

Managing Intravenous Fluid Therapy 2002 20 min Video tape e 676501
This video presents regulating IV infusions, including calculating drip rate, using the roller-clamp method and infusion pumps; changing IV tubing and fluids; changing IV dressings, including assessment of the infusion site. Intravenous therapy; Nursing

Measurements 2002 22:25 min e675301
Demonstrates how to take accurate measurements in height and weight, intake and output of fluids, temperature, and blood pressure. Nursing

Mood Disorders
See The Comprehensive Nclex-Rn Video Review Series

Moving Parts 1985 26 min Videotape E2482
Shows how human muscle activity is coordinated by the cerebellum and how position sensors in the muscles and joints along with the balancing mechanism of the inner ear enable the body to be controlled. Presents cinemicrophotography of the interior of the knee. Human Mechanics; Labyrinth (Ear)

Muscle Power 1985 26 min Videotape E2489
Through cinemicrophotography, shows how human muscles produce enormous strength as two types of molecules telescope against each other in large numbers. Includes muscular activity that takes place involuntarily, such as contraction of the heart muscle and the motion of the digestive tract. Gastrointestinal System; Heart; Heart–Muscle–Diseases; Human Mechanics

Musculoskeletal Disorders
See The Comprehensive Nclex-Rn Video Review Series

Musculoskeletal System 1995 22 min Videotape E3960
Overview of the musculoskeletal system. Inspection for symmetry and deformities, range of motion, and palpation are demonstrated. Neck, hands, wrists, elbow, knee, scapula, ankles and feet, hip, and spine are among the areas covered. Periodic Health Examinations; Physical Diagnosis

Nclex Cat: Computerized Adaptive Testing 1992 11 min Videotape E5012
Explains why the National Council has decided to change from paper and pencil testing to a new computerized adaptive testing technique for administering the national licensure tests for nursing. Describes what CAT is, and how its use will improve the NCLEX. Nursing—Examinations, Questions, Etc

Neurological Disorders
See The Comprehensive Nclex-Rn Video Review Series

Neurological: Motor System and Reflexes 1995 20 min Videotape E3956
Provides an overview of the motor system which includes assessment of body position, involuntary movements, muscle bulk, muscle tone, and coordination. Testing of the reflexes which assesses both motor and sensory functions. The examiner will assess a healthy patient. Motor Neurons—Physiopathology; Neurologic Examination; Physical Diagnosis

Normal Elimination 2002 24:19 min e675401
Discusses and demonstrates nursing techniques used to assist in the process of elimination, including the urinal, bedpan, catheter, and administering an enema. Excretion; Nursing

Nose, Mouth, and Neck 1995 11 min Videotape E3951
Assessment of a healthy patient includes the shape of the skull and size of the head in proportion to the rest of the body, skin color and condition of the face, all parts of the mouth, symmetry of the neck, inspection of the trachea for deviation, and palpation of thyroid from front and behind. Examinations; Physical Diagnosis

Introduces the concept of liability, sole and joint, and the conditions under which charges of negligence or malpractice must be proved. With the failure to provide care to an appropriate standard as the basis for client injury, the frequent causes of negligence and the malpractice liability are examined. Nursing—Law and Legislation; Nurses—Malpractice—United States
Nursing in America: A History of Social Reform 1986 30 min Videotape E2051/1 Videotape E2051/2 CON0156 CON0134 Chronicles the social and economic events of our country that shaped and changed nursing and were changed by nursing. These include feminism, community health, civil rights, social activism and service.

Nursing

Nursing: One View of the Future 1994 14 min Videotape E3299 Demonstrates how innovative telecommunications and computer technology could change nursing education and practices. A student nurse visits a patient at her home, using a computerized portable “Nightingale Tracker” to access medical records, communicate with her supervisor, provide patient treatment instruction, and record and transmit vital signs and symptoms.

Medical technology; Nursing; Nursing—Practice; Nursing—Study and Teaching

Nursing the Mind 2000 52 min Videotape E6372 Psychiatric nurses at Johns Hopkins Hospital in Baltimore are the focus of this episode of the series, Nurses. This program follows the work of these nurses as they counsel and support patients with severe depression, bipolar disorder, anorexia nervosa, and schizophrenia. As the nurses are in close, regular contact with the patients, the doctors depend on their observations to help in diagnosis and treatment.

Nursing; Psychiatric Hospital Care; Psychiatric nursing

Nursing Theory: A Circle of Knowledge 1987 52 min Videotape D452 Interviews 6 outstanding women in the nursing field on changes in nursing practice and how the changing scene is affecting theory now and in the future. Interviewees include Virginia Henderson, Martha Rogers, Dorthea Drem, Sister Callista Roy, Jean Watson, and Patricia Benner.

Nursing; Nursing—Philosophy

Nutrition and Fluids 2002 16:15 min e675701 Focuses on the skills needed to help promote adequate nutrition and fluid intake. Includes preparing for meals, serving meal trays, and serving the dependent person.

Care of the Sick; Nursing; Nutrition

Oasis 1999 30 min Videotape E5438 Explains and demonstrates the use of OASIS, Outcome and Assessment Information Set, which provides essential data for outcome-based quality improvement of patient care by home health care agencies. By studying the data patient outcomes can be evaluated to determine which behaviors have resulted in positive or negative outcomes, allowing agencies to refine their procedures and services to maximize successful treatment.

Opening Doors 1995 33 min Videotape E3210a2 Highlights the profession of public health nursing which entails the nurse going out of the homes of the people their serving. It describes the commitment of nurses to the family and community in which they live and to the prevention of illness.

Nurses; Public health nurses—United States—Interviews

Oral Medication Administration 1991 23 min Videotape E1216 Describes preparation, administration, and documentation of oral medication utilizing the “Five rights of medication administration.” The legal and ethical responsibilities governing medication administration are stressed. A set-by-set demonstration reinforces the procedure for safely and effectively administering medications. The importance of a knowledge base for each medication to be administered with assessment, implementation, evaluation and documentation is emphasized.

Drugs—Administration; Nursing

Ostomy Care 2002 27:29 min e675901 Presents clear demonstration of how to perform ostomy care procedures, including an enterostomy (colostomy) and pouching a noncontinent urinary diversion (ureterostomy).

Colostomy; Nursing

Oxygenation 2002 20 min video tape E676401 This video presents oxygen safety; flow rates by nasal cannula and face mask; applications of cannula and mask; airway maintenance, including suctioning; tracheostomy care.

Nursing; Oxygen Therapy; Respiratory Organs—Diseases; Respiratory Therapy

Parenteral Medication Administration Tape No.1: Equipment Preparation Tape No.2: Preparing Medication from an Ampule Tape No.3: Preparing Medication from a Vial Tape No.4: Site Selection and Injection Techniques Drugs—Administration; Hypodermic Needles; Parenteral Therapy

Equipment Preparation 1992 19 min Videotape E2793/1 Describes the properties of equipment used in administering injections and how to effectively use them, factors in patients that affect the procedure, how to protect patients from injury during injection, as well as the many common variations in the procedure, designed to provide information essential to developing a safe and effective injection technique.

Drugs—Administration; Hypodermic Needles; Parenteral Therapy

Preparing Medication from a Vial 1992 16 min Videotape E2793/3 Describes the properties of equipment used in administering injections and how to effectively use them, factors in patients that affect the procedure, how to protect patients from injury during injection, as well as the many common variations in the procedure, designed to provide information essential to developing a safe and effective injection technique.

Drugs—Administration; Hypodermic Needles; Parenteral Therapy

Preparing Medication from an Ampule 1992 13 min Videotape E2793/2 Describes the properties of equipment used in administering injections and how to effectively use them, factors in patients that affect the procedure, how to protect patients from injury during injection, as well as the many common variations in the procedure, designed to provide information essential to developing a safe and effective injection technique.

Drugs—Administration; Hypodermic Needles; Parenteral Therapy
Site Selection and Injection Techniques
1992 27 min Videotape E2793/4
Describes the properties of equipment used in administering injections and how to effectively use them, factor in patients that affect the procedure, how to protect patients from injury during injection, as well as the many common variations in the procedure, designed to provide information essential to developing a safe and effective injection technique. Drugs—Administration; Hypodermic Needles; Parenteral Therapy

Pathophysiology of Breast Cancer
1997 20 min Videotape E4027 c.2
Describes the causes, types, and symptoms of breast cancer and how a patient’s clinical manifestations relate to the development and progression of breast cancer. Cancer—Nursing

Patient to Patient: Cancer Clinical Trials and You
1999 14:40 min Videotape E6385
Patients who have participated in a clinical trial talk about their experiences and address many common concerns of patients considering a clinical trial, such as risks, benefits, eligibility, enrollment and costs. Cancer—Nursing; Video recordings for the hearing impaired

Patients Love Their Nurses
1999 11 min Videotape E6646
Captures the essence of care giving in the words of 7 patients whose lives have been changed by their nurses. Nursing

Pediatrics
2000 52 min Videotape E6368
The pediatric unit at Johns Hopkins in Baltimore is the focus of this episode of the series, Nurses, as the viewer gets a firsthand look at the daily routine of 3 nurses. Each nurse comments on why they became nurses, why they chose pediatrics, and discusses the pros and cons of working with children and teenagers. Hygiene; Pediatric nursing

Personal Hygiene and Grooming
2002 30:23 min Videotape E6730
The pediatric unit at Johns Hopkins in Baltimore is the focus of this episode of the series, Nurses, as the viewer gets a firsthand look at the daily routine of 3 nurses. Each nurse comments on why they became nurses, why they chose pediatrics, and discusses the pros and cons of working with children and teenagers. Hygiene; Pediatric nursing

Physical Assessment of the Normal Newborn
1991 27 min Videotape E2962
Demonstrates physical assessment of newborn infants and teaches the procedural sequence, significance of findings, and the reflexes involved. Infants; Infants (Newborn)—Care; Infants (Newborn)—Diseases—Treatment—Decision-Making; Infants (Newborn)—Medical Examinations; Physical Diagnosis

Physical Assessment: The Integumentary System
1997 23 min e4995
Presents guidelines for baseline assessment of the skin, hair, and nails and illustrates clinical abnormalities as well as variations within the normal range. Demonstrates systematic inspection and palpation. Covers evaluation of skin color, vascularity, temperature, mobility, tugor, texture, moisture, edema, and the presence of lesions or masses. Haircutting; Physical Diagnosis; Skin—Wounds and Injuries—Diagnosis

Portraits of Excellence

Portraits of Excellence: Jean Watson
1988 47 min Videotape E774
Part 5 of the "Portraits of excellence" series. Jean Watson discusses her work in nursing. Nurses—United States—Biography; Nursing; Nursing—United States

Portraits of Excellence: Reva Rubin
47 min Videotape E778
Part 9 of the "Portraits of excellence" series. Reva Rubin discusses her early life growing up in Massachusetts, her education at Yale and her experiences as a public health nurse; and, in an interview with Jacqueline Fawcett in Harrisville, Pa., she elaborates on her theory of clinical nursing and how it represents a model for both practical nursing and nursing research. Nurses—United States—Biography; Nursing; Nursing—United States

Portraits of Excellence: Margaret A. Newman
1990 48 min Videotape E950
Part of the series 'Portraits of Excellence'. Dr. Newman discusses her early life in Tennessee, her education at Yale and at New York University and her teaching career at various institutions. In an interview at the University of Minnesota where she is currently a professor of nursing, she explains her theory of health as expanding consciousness in which health is based on consciousness, movement and space/time. Nurses—United States—Biography; Nursing; Nursing—United States

Portraits of Excellence: Virginia Henderson
1988 35 min Videotape E781
Part 12 of the "Portraits of excellence" series. In an interview with Jacqueline Fawcett in New Haven, Connecticut, Virginia Henderson discusses her definition of nursing, with its emphasis on patient care and patient involvement, and her interest in nurses as primary care-givers who are involved in the diagnosis and treatment of patients. Nurses—United States—Biography; Nursing; Nursing—United States

Portraits of Excellence: Imogene King
1989 32 min Videotape E782
Part 13 of the "Portraits of excellence" series. Imogene King discusses her early life and education and in an interview with Jacqueline Fawcett in Tampa, Florida, elaborates on her teaching, her conceptual framework of interacting systems, and her theory of goal attainment. Nurses—United States—Biography; Nursing; Nursing—United States

See Community Health Nursing Video Series

Thorax and Lungs
1995 23 min Videotape E3957
Presents a brief survey of a patient's thorax and respiration. Shows examination of the posterior thorax using inspection, palpation, percussion, and auscultation and examination of the anterior thorax using the same techniques. The examiner will assess a healthy patient.

Chest Examination; Lungs Examination; Periodic Health Examinations; Physical Diagnosis

To Care
1987 28 min Videotape E945
A video documentary that provides a glimpse into the lives of three family caregivers. Today, many older people who are frail or sick are cared for at home, rather than in an institution. Their caregivers are often their peers: spouses; siblings of similar age; friends; neighbors; sometimes adult children who have reached late middle age.
